## Welcome to the Student DataBase System

This website is User friendly for students for storing and Modifications of student Data

In any colleges/schools student information has been manually entered into the record books by the administrator. Even if student wants to an update his personal information, has to approach the administrator, then administrator has to search the record of the student in the record books which is a tedious (time consuming) process. Student data base application overcomes these problems.

Student Database is a web application, used to keep track of information about the student. Students can add, view, update their information from any where.
